

Introducing SmartDitch.TM Finally, Smarter Solutions in Water Management.

Up until now, water management approaches and technologies have not provided a safe, economical, easy, long-lasting and environmentally sound way to manage water flow. Finally, there's SmartDitch: a patented, flexible, thermoformed plastic ditch-lining system from Penda Corporation. A global leader in thermoforming, Penda is uniquely set up to bring SmartDitch to you. SmartDitch is ideal for agriculture/irrigation, erosion control/repair, stormwater management and public works applications. SmartDitch is a smarter solution to rebuilding, reinstalling and repairing yesterday's water management infrastructure:

- Significantly lower installation and maintenance costs than concrete and pipe ditch- and channel-lining systems
- Stronger and longer lasting; backed by a 10-year warranty
- A faster, easier installation with minimal environmental disturbance
- Proven ability to reduce water loss through seepage by up to 90 percent
- Manufactured to the ISO 14001 Environmental Standard
- Manufactured to NRCS and EPA standards

Shapes & Sizes to Fit Your Project

24" Semi-Circular

36" Semi-Circular

Trapezoidal
